

A simple guide to RSN online spreadsheets – The labour market in your area

The attached spreadsheet presents information on the employment situation in a chosen local authority area.

The spreadsheet allows the user to select the authority type, either Unitary or District, and then the authority of interest. The spreadsheet then presents the associated employment statistical information for each quarter of the preceding three years.

All data comes from statistics released by the ONS.

To make your selections from the analysis, please follow these instructions:

The spreadsheet provides the average position for similarly classified rural authorities, the regional average, as well as comparatives for Predominantly Rural and Urban authorities overall.

I hope this helps and the spreadsheet provides a useful snapshot of the situation in your area. If you have any comments or suggestions, please contact dan.worth@sparse.gov.uk

NB. Where no data exists, the chart will show a zero value. Data might not be available due to issues of disclosure or reliability where the sample size is small.
