

## **Sherburn in Elmet Town Council - Wildflower Planting**

February 2024

[Sherburn in Elmet Town Council](#) have embarked on a long term project of planting wildflower meadows to improve biodiversity, encourage wildlife, reduce the need for grass cutting and to enhance the image of the town to both residents and visitors.

We trialled an area in Spring of 2023 which flourished and bloomed all summer, admired and commented on by many. 2024 has seen the project develop with new areas within the town earmarked for additional meadows which are being prepared now.

Sherburn in Elmet is fortunate to have a passionate community of volunteers and youth groups who will be involved in the planting this year which is something the council have been very keen to encourage. The council have also asked our younger residents for artwork that will be displayed around the town at the meadow sites and on publications used to promote the project.

We are very much looking forward to another year of colour and biodiversity in Sherburn in Elmet and many more to come.
