

## A simple guide to RSN online spreadsheets - A closer look at travel to work in your area

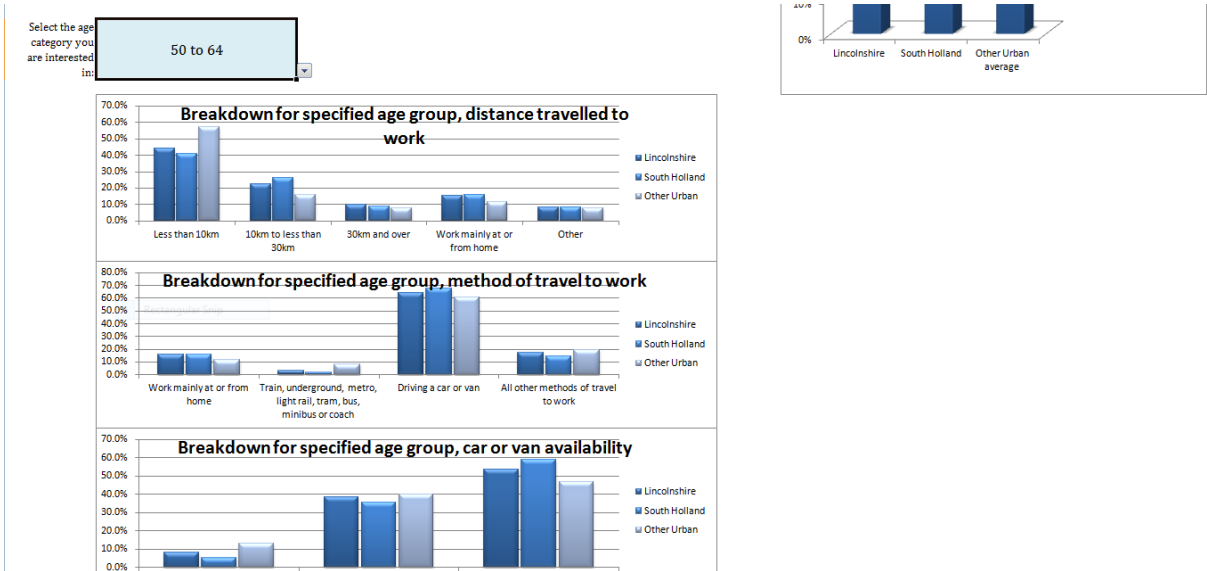

Being able to access appropriate employment is vital for any community to thrive, and for a rural community this often comes with the need to travel. This analysis looks at the situation in your area, and may draw some light on issues affecting the different age groups that make up your community.

To use this spreadsheet analysis, please follow these simple instructions.

To consider the travel to work situation for each of the age groups, the next option (highlighted) allows the user to select a specified distance travelled. This then populates the bar chart immediately under the option, which shows the situation for each of the given age categories.

To allow a more detailed consideration of a specific age category, the next option (highlighted) allows the selection of one of five age ranges. This then populates the remaining three bar charts with the appropriate data.

I hope this helps and the spreadsheet provides a useful snapshot of the situation in your area. If you have any comments or suggestions, please contact [dan.worth@sparse.gov.uk](mailto:dan.worth@sparse.gov.uk)
